

Attorney Docket No.: 050623.00334

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of the claims in the application:

Listing of Claims:

Claims 1. – 24. (Cancelled)

25. (Currently Amended) A ~~drug-loaded particle formulation~~ method of coating a stent comprising:

adding polymeric particles containing a therapeutic substance to a fluid form of a stent coating material, wherein the coating material includes a polymeric material dissolved in a solvent, ~~and wherein~~ such that the polymeric particles containing the therapeutic substance are suspended in the coating material ~~polymeric material dissolved in the solvent;~~

applying the fluid form of the coating material comprising the polymeric particles added thereto to a stent; and

solidifying the coating material to a film layer by allowing the solvent to evaporate, wherein the film layer includes the polymeric particles containing the therapeutic substance.

26. (Cancelled)

27. (Cancelled)

28. (Cancelled)

29. (Cancelled)

30. (Previously presented) The method of Claim 25, wherein the polymeric particles are made by water-in-oil emulsion.

Attorney Docket No.: 050623.00334

31. (Previously presented) The method of Claim 25, wherein the polymeric particles have a hydrogel consistency.
32. (Previously presented) The method of Claim 25, wherein the therapeutic substance is for the treatment of restenosis.
33. (Cancelled)
34. (Previously presented) The method of Claim 25, wherein the film layer includes the polymeric material encasing the polymeric particles.
35. (New) The method of Claim 25, wherein the polymeric material dissolved in the solvent is selected from the group consisting of polyvinyl alcohol, ethylene-vinyl alcohol copolymers, polyurethanes, and copolymers and mixtures thereof.
36. (New) The method of Claim 35, wherein the polymeric material dissolved in the solvent is a polyurethane.
37. (New) The method of Claim 35, wherein the polymeric material dissolved in the solvent is polyvinyl alcohol.
38. (New) The method of Claim 35, wherein the polymeric material dissolved in the solvent is an ethylene-vinyl alcohol copolymer.
39. (New) The method of Claim 25, wherein the coating material further comprises a second therapeutic substance that may be the same as or different from the therapeutic substance of the polymeric particles.
40. (New) The method of Claim 25, wherein a polymer of the polymeric particles is different from the polymeric material of the coating material.
41. (New) The method of Claim 25, wherein the coating material is free from any therapeutic substances.

Attorney Docket No.: 050623.00334

42. (New) The method of Claim 25, wherein the film layer is free from any therapeutic substances such that the therapeutic substance is encased only in the polymeric particles.
43. (New) The method of Claim 42, wherein a polymer of the polymeric particles is different from the polymeric material of the coating material.
